A financial planning tool your students will actually use.

MedDebt models the full physician loan journey — PSLF, IBR, refinancing, 21 specialty salary presets — in under 2 minutes. Available co-branded or fully white-labeled, pre-populated with your school's debt data.

40–60 hrs/yr Staff time answering repetitive loan questions per financial aid office	**$248K+** Average student debt at high-debt schools like Georgetown, GW, Rush	**90 days** Window when PGY-1 residents make their PSLF vs. refinancing decision

Why institutions license MedDebt

→ Answers questions your staff fields every day

PSLF vs. refinancing, IBR during residency, specialty salary projections — students get instant answers instead of a 30-minute appointment.

→ Stays current through policy chaos

SAVE eliminated March 2026. RAP launched July 2026. PAYE/ICR sunsetting. The tool updated automatically — no work on your end.

→ Works for every student

AAMC MLOC requires an AAMC login and doesn't work for DO or Caribbean students. MedDebt works for everyone, no account required.

→ Satisfies LCME financial counseling requirements

Documentable for your accreditation report. A licensed MedDebt integration counts as institutional financial counseling support.

→ Data your office has never had

See which strategies students modeled, which specialties they selected, how many students engaged. Intel your office has never had.

Licensing tiers

Tier	Annual price	What you get
Co-Branded	$3,000 – $5,000 / yr	MedDebt iframe on your financial aid page, your logo, pre-populated debt data, usage analytics, your contact in student results.

White-Label	$8,000 – $15,000 / yr	No MedDebt branding. Hosted on your subdomain (loans.hms.edu). Full custom branding. Exportable reports. Priority policy updates. Dedicated onboarding.
Per-Resident	$15 – $30 / resident / yr	For large residency programs (200+ residents). White-label included. Billed annually.

Pricing is flexible — happy to work within your budget or procurement process.
